## EXPORT

Smelt 'osmerus mordax' (also called rainbow or American smelt) are a small, silvery fish related to Salmon and Trout. Capelin are also members of the smelt family. Introduced into the Great Lakes from the North Atlantic early in the 1900's, smelt's original habitat is the North Pacific and North Atlantic Oceans.

As an anadromous specie, the Ocean Smelt quickly adapted to their new 100% freshwater environment, developed new characteristics unique to Lake Smelt and proceeded to populate all the Great Lakes. In Lake Erie, they particularly flourished due to the sandy bottom and warm, fast-flowing waters. Today, with only 2% of the Great Lakes water, Lake Erie continues to produce in excess of, an estimated 90% of all freshwater Lake Smelt.

By the middle of the last century, Lake Smelt became a viable commercial fishery. When the Canadian government introduced catch quotas for Lake Erie in the mid-1980's to help ensure sustainability, the quotas (TAC) for Lake Smelt surpassed all other quota species combined.

At Great Lakes Food Company, our predecessors pioneered Lake Smelt harvesting in the mid 1900's. Today, as the largest quota holders and owner-operators of five Licensed fishing vessels specializing in 'smelt only' harvesting, Great Lakes Food Company continues to be recognized as the leading global supply source.

Exporting Lake Smelt began in those very early stages - initially with fresh smelt 'in-season', which soon expanded to 'year-round' frozen smelt shipped to customers across North America. Before the development of containerization, our frozen Lake Smelt were shipped 'break-bulk' in ocean-going vessels, initially to Europe. In the early 1960's, a demand was recognized in Japan for 'niji wakasagi' and quickly in other Asian countries as well. Today, we routinely load directly from our doors in Chatham, Ontario, 40' containers each with 20 - 22MT frozen Lake Smelt destined to many long-time as well as new customers across both Atlantic and Pacific oceans.

### MAIN ITEMS SUPPLIED

- IQF Dressed (H&G) Smelt
- IQF Battered (H&G) Dressed Smelt
- IQF Whole Round (WR) Smelt
- IQF Battered Whole Round (WR) Smelt

### MAIN SIZE GRADES

Our Whole Round Smelt are available carefully size-graded into (5) categories:

**SMALL - MEDIUM - LARGE - JUMBO - EXTRA JUMBO**

We can also supply un-graded LAKE RUN size to pre-season orders. As with all wild-caught, naturally-harvested fish, availability of each size will vary.

Please contact us for current seasonal availability.

### MAIN PACK SIZES

All our product is individually frozen (IQF), glazed and packed on a guaranteed Net Weight (NW) basis:

BULK CARTONS (each carton polylined) :  
**5kg NW - 10kg NW - 500kg NW (totes)**

CONSUMER SIZE PACKS (Sealed polybags inside a master carton) :  
**12 x 1lb NW - 12 x 2lb NW - 6 x 1kg NW**

**\*\* Customer Private Label packing is also available \*\***
